

SUBMERSIBLE

4SKm 100E

BOREHOLES

The **4SKm 100E** pump is a high head pump with a 304 stainless steel delivery housing and motor jacket. It is designed for clean water supply applications only and is used for industrial applications, including processing and potable water. The 416 stainless steel shaft is fitted with a single mechanical seal and a brass, peripheral-type impeller. Trouble free operation is enhanced with an anti-blocking shim disk. For simple and easy installation it is supplied with flat power cable (20 metres is standard, 30 metres is optional) and features an integral starting capacitor. Flow can be controlled by including a pressure controller in the delivery line (see page 46).

- ✓ Wells
- ✓ Irrigation
- ✓ Potable water
- ✓ Processing
- 1" (25mm) outlet
- 100mm (4") bore size
- manual
- medium head
- 230 volts
